**HEALTH & SAFETY PART 1 & 2
5 Day Program**

COST \$699.00- INCLUDES LUNCH EACH DAY

Public Services Health & Safety Association

Certification Part One for Joint Health and Safety Committees; Three Days

This program is the first part of the training process for individuals to be certified under guidelines established and enforced by the Ontario Ministry of Labour.

Workplaces with 20 or more regular employees must have at least two personnel who have completed the certification training.

Upon completion of Certification Part One, participants will understand the relevant legislation as well as their legal rights and responsibilities.

Participants will also learn about common workplace hazards and key steps to addressing these hazards. This knowledge will prepare participants to carry out workplace inspections and accident investigations, and enable them to function effectively as JHSC member certification.

Part Two Fire Workplace Hazard Specific for JHSC; Two Days

As the second part of the JHSC certification process, Sector Specific Certification assists JHSC members with issues to their work environment. To complete Certification Part Two, both management and worker members of the JHSC must receive training in the significant hazards found in their workplace. Upon completion of Certification Part Two, participants will be able to identify the hazards commonly found in fire services, and describe how they may cause injury or illness. The program will enable participants to effectively recognize and assess these sector specific hazards, as well as outline methods for controlling them.

Participants will also learn about relevant legislation, standards and guidelines.

**Apparatus with Fire Pump Train the Trainer
5 Day Program**

COST \$200.00- INCLUDES LUNCH EACH DAY

Apparatus Equipped with a Fire Pump (Pump Ops) program meets the knowledge and skill requisites established by the NFPA 1002 Standard for Fire Apparatus Driver – Operator Professional Qualifications Chapter 5, 2014 Edition.

This course will cover the job performance requirements that shall be met under NFPA 1002 Chapter 5, 2014 Edition. Upon successful completion of this course each student will understand and be able to demonstrate the operation of a fire department pumper from both a static and pressurized source of water.

Provincial testing through Academic Standards and Evaluation with the Office of the Fire Marshal and Emergency Management will be available at the conclusion of the course for students wishing to receive certification.

Prerequisites: NFPA 1001 Fire Fighter I or NFPA 1001 Fire Fighter I Recruit, and a valid DZ License. Proof of a valid DZ License must be presented to the Instructor at the commencement of the class.

****Students that fail to provide the proper documentation**
will not be eligible to attend the class.**

**First Aid– CPR Level HCP Certification
2 Day Program**

COST \$225.00- INCLUDES LUNCH EACH DAY

Gord Driscoll is the owner of Grand Valley Safety which is a safety training and consulting provider. Gord has 27 years' experience at creating and delivering safety training. Gord's company is an approved provider with the Ministry of Labour and St Johns and works with many large companies on special equipment training.

Course Information:

Standard First Aid - CPR Level HCP (Health Care Provider)

This course is for individuals who are working or plan to work in the Health Care field and require the Health Care Provider level of CPR. The course includes all CPR skills plus advanced skills such as artificial respiration and use of bag valve masks and AEDs. Provincially recognized certificate which meets WSIB and Canadian Labour Code certification, valid for three years, is issued upon successful completion.

CPR Level HCP (Health Care Provider)

CPR for Health Care Providers (HCP) is specifically designed for the current and future Nursing, Health and Emergency Care Service Providers. Topics covered include cardiovascular and respiratory emergencies, adult, child and infant CPR skills, two-rescuer CPR, automated external defibrillation (AED), use of the bag valve mask, rescue breathing and jaw thrust, anatomy and physiology and infection control. Each student will receive a St. John Ambulance First Aid Reference Guide with over 400 pages of information, full colour illustrations, charts, glossary and more. This course is a recognized prerequisite for post-secondary health and emergency service training programs. Provincially recognized certificates are issued upon completion. Annual retraining in CPR is recommended

**FORIBLE ENTRY ALL HANDS ON
1 Day Program**

COST \$275.00- INCLUDES LUNCH EACH DAY

INSTRUCTOR ANDREW BRASSARD: In 2006, Andrew was one of two Milton Firefighters who received both the Ontario Medal for Firefighter Bravery and the MSA Fireslayer of the Year Award for Heroism for his role in saving the life of a civilian.

Rotation 1- Conventional Forcible Entry

Inward and outward doors, Size Up, Wood doors, limited and zero visibility

Rotation 2- Through the Lock, Padlocks, hinge side

Each Student will pull lock cylinders, learn about mortise and rim locks. Students will break padlocks in a few different ways, learn about lock construction and how to force a door from the hinge side.

Rotation 3- Saws

Students will practice cutting simulated window bars, saw set up and maintenance. Cut locks, Various heights and simulated fortified doors.

Rotation 4- Window Bars

Proper use of the halligan and hook, garage doors, bolt shearing, driving bolts through the door.

**Commercial Vehicle Extrication Course (Heavy Truck)
1 Day Program**

COST \$275.00- INCLUDES LUNCH EACH DAY

RS Rescue: RS Rescue has been Ontario's choice for full time fire department instructors, training officers and firefighters for over 8 years now.

RS Rescue lead instructor: John O'Blenis, has over 17 years' experience firefighting. He holds the rank of captain and is currently working out of headquarters with Brampton Fire and Emergency Services'. John is the senior vehicle extrication shift instructor for BF&Es with 11 years in the position. Six years as an extrication team member with three years as team Incident Commander.

RS Rescue instructors will guide you through the challenges that rescuers face when tackling commercial/heavy vehicle incidents. Students will learn about the variety of types of these vehicles, their construction, additional hazards associated with these vehicles, and a variety of tactics that will assist in safe operations and successful incident mitigation. Students will enjoy our hands-on approach to each of the work stations!

**LARGE ANIMAL RESCUE
1 Day Program**

COST \$200.00- INCLUDES LUNCH EACH DAY

In today's society, responding to incidents involving animals is both an expectation and an acknowledgement that such incidents will likely involve people putting themselves and others at risk.

All large animal incidents regardless of cause or scope, present a risk of injury to first responders. Through proper training and the use of specialized rescue equipment we significantly mitigate these risks and improve the odds of a favourable outcome for both animals and responders. By keeping responders safe, we improve our capacity to keep animals safe.

Awareness Level TLAER Concepts, Technical rescue overview

Hazard considerations

NFPA 1670 chapter 17

Incident command – where does everyone fit into the scene

PPE, Safe Zones, Considerations inside the barn, barn types, fire safety and evacuation

Trailer accident basics, Behaviour, Anatomy

Tools and Equipment

Manipulations, Drags, Lifts, Slings, Capture/Containment

Addition hazards

**Autox Train the Trainer Code 4 Rescue
2 Day Program**

COST \$395.00- INCLUDES LUNCH EACH DAY

Typically this is a 3 day comprehensive course that Code 4 Fire & Rescue has put on for a few years now. We have modified it to fit into a 2 Day time period course for departments that don't have the time for 3 days

In this course, key elements include:

- 1) Classroom – Understanding Hydraulics and New Car Technology and how the two relate to one another from a practical and performance standpoint.
- 2) The fine points of basic and advanced evolutions:
 - The 10 Power Evolutions that comprise 85% of Extrications
 - Understanding Tool Placement and Angles
 - Choosing the right tools and why
 - Total Side Removals
 - Dash Displacements – Simple to Complex
 - Roof relocations
- 3) Real Road Rescue – You are told your patient is going to expire in 3 minutes and he is trapped and pinned behind the wheel.....what do you do?
- 4) The Power of Forensic Learning (enhancing creative visualization)
- 5) How to maximize Class time when you are Training on your own after completion of this class
- 6) Measuring performance – Practical Strategies to gauge improvements in your team after completion of this class
- 7) Confidence Building – The Power of Positive Mentoring
- 8) Lesson Planning: Creating Powerful Lessons for a Training night or Day

DAY 1:

Classroom: A thorough lesson in Understanding Hydraulics and how it impacts Tool Performance
New Vehicle Technology Overview

DAY 2:

8 am – 9am	Forensic Classroom Test
9 am – 12 Noon	Practical
1 pm – 4:30 pm	Practical

**Fireground Survival & Rapid Intervention Teams
Train-the-Trainer
4 Day Program**

COST \$1099.00- INCLUDES LUNCH EACH DAY

The Fire Department Training Network's Fireground Survival & Rapid Intervention Teams Train-the-Trainer Course is the most comprehensive RIT training program and curriculum available.

The course provides departments with a comprehensive, step-by-step, instructional program for developing, training, and implementing a fire department RIT program. The program, and associated curriculum, exceeds all aspects as outlined in NFPA 1407 Standard for Training Rapid Intervention Crews. This 40-hour Train-the-Trainer course prepares you to deliver FDTN's highly-successful 3-day Fireground Survival and Rapid Intervention Teams training program.

Students who successfully complete all written and practical components of this intense Train-the-Trainer program will receive FDTN's Fireground Survival and Rapid Intervention Teams training curriculum package. The training package covers:

- Firefighter Survival
- Firefighter Rescue
- Rapid Intervention Team Operations

The Train-the-Trainer program consist of classroom and hands-on training, as well as student-lead teaching components.

Successful completion will allow the Trainers to return to their individual departments with a complete training program that can be delivered to its members. By implementing the program outlined in the Fire Department Training Network's Fireground Survival and Rapid Intervention Teams Instructor Manual and using Fireground Survival Student Kits (includes student manuals, student tests, and student certificate), trainers will be able to deliver this program to all their department personnel.

The program also provides your department with the flexibility to present the material in modules (The program can be taught as a 3-day course or broken into individual components.). This provides the option of integrating it into the department's normal work schedule.
